CODEALPHA CYBER SECURITY INTERNSHIP · TASK 2

Phishing Awareness Training

Learn to spot fake messages and stay safe online

Presented by Syeda Eeman Fatima

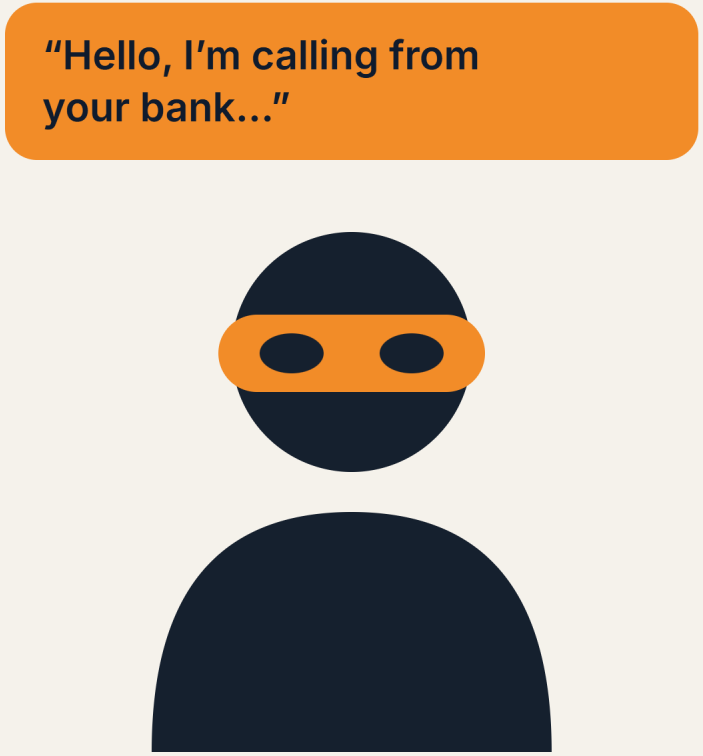

THE BASICS

What is phishing?

A scammer pretends to be someone you trust to steal your password, OTP or money.

It can reach you by:

- Email
- SMS & WhatsApp
- Phone calls

EXAMPLE 1

A fake email

1 **From:** SecureBank <alerts@securebank-verify.co>

2 **Subject:** Your account will be BLOCKED today!

Dear Customer, we noticed a problem with your account. Verify your details now or lose access.

3 **Click here to verify**

→ `securebank.account-check.xyz/login`

1. **Fake sender.** Not the bank's real address.
2. **Scary deadline** to make you panic.
3. **Fake link.** It opens a different website.

EXAMPLE 2

Fake SMS & WhatsApp messages

Unknown number

Congratulations! You won Rs. 50,000 in a lucky draw. Call now to claim your prize!

⚠ You never entered any lucky draw.

Parcel Service

Your parcel is on hold. Pay Rs. 150 to deliver it: bit.ly/pay-fee

⚠ Unknown short link and a surprise fee.

“Friend” (new number)

Hi! I sent you a 6-digit code by mistake. Please send it back to me.

⚠ That code unlocks YOUR WhatsApp.

EXAMPLE 3

Real or fake website?

https://www.facebook.com	REAL
https://www.faceb00k-login.com	FAKE: zeros, not “o”
https://securebank.com/login	REAL
https://securebank.com.verify-login.xyz	FAKE: owner is verify-login.xyz

Tip: read the name just before the first “/”. That is the real owner of the website. The padlock alone does not mean it is safe.

REMEMBER

6 warning signs

Hurry!

“Act now or your account will be closed.”

Strange sender

The name looks real, the address doesn’t.

Weird link

Short or misspelled web address.

Asks for secrets

Password, PIN or OTP code.

Too good to be true

Prizes you never entered for.

Spelling mistakes

Real companies check their messages.

STAY SAFE

5 simple rules

- Never share your password, PIN or OTP, not even with “bank staff”.
- Check the sender and the link before you click.
- Not sure? Call the company on its official number.
- Turn on two-factor authentication (2FA).
- Clicked by mistake? Change your password and tell your bank right away.

QUICK QUIZ

Phish or real? Click to reveal

SMS

“You won a free iPhone! Click bit.ly/free-phone to claim it.”

Phish

A prize you never entered, plus a short link.

Call from “your bank”

“Please tell us the OTP we just sent, to stop a fraud on your account.”

Phish

Banks never ask for your OTP.

Your bank’s official app

“Your monthly statement is ready to view in the app.”

Real

Official app, no link, nothing asked from you.

KEY TAKEAWAY

Stop. Think. Verify.

Pause before you click, check the sender and the link, and never share your OTP.

Test yourself with the 10-question quiz:
